PRIVATEEGO PRESENTS

REVISEIT.AI

Understand the concept once and let AI help you execute that concept efficiently and effectively.

WHILE READING A BOOK OR ATTENDING A LECTURE.

YOU UNDERSTOOD A COOL CONCEPT AND YOU KNOW THAT YOU ARE GOING TO FORGET IT!

Since forgetting curve demonstrates that within 24 hours, learners may forget up to 70% of new information, and within a week, up to 90% can be lost.

So you try to make notes or revise it or solve related problems to understand it using spaced repetition and active recall.

THE MOST COMMON PROBLEMS THAT STUDENTS AND PROFESSIONALS FACE?

1. I do not have time to revise.
2. Revision is boring
3. I make notes but never read them
4. During exam I forget the concept I grasped.
5. I am unable to implement the knowledge properly because a long time has been passed since i studied it.

WHAT IF ARTIFICIAL INTELLIGENCE HELP YOU?

1. Just tell Reviseit.ai the concept you studied and purpose it serves e.g. exam name and date.

2. Upload your resources in any format e.g. books, notes, lectures, links, or even just name of concept.

3. The App will make sure you remember the concept and implement it right.

HOW REVISEIT.AI WILL DO THAT?

1. App will schedule your Spaced Repetition of Active Recall by leveraging AI.

2. App will assess your learning and understanding of concept at each revision and get your feedback to implement it at next emendation.

3. App will automatically create notes in mind map format with your feedback and also enable you to integrate everything to other apps such as Notion, Google docs, Calendar etc.

VISION AND MISSION

TOGETHER, LET'S CREATE THE WORLD'S BEST APP THAT ENABLES INDIVIDUALS TO EXECUTE THEIR KNOWLEDGE EFFICIENTLY AND EFFECTIVELY.

IN NEAR FUTURE, WE STRIVE TO BUILD THIS APP AS SECOND BRAIN THAT SEAMLESSLY INTEGRATES WITH USER ON ONE PURPOSE TO HELP HIM IN HIS JOURNEY FROM KNOWLEDGE TO IMPLEMENTATION.

LET'S BUILD REVISEIT.AI AS OPEN SOURCE.

- Similar to Llama, it is free to use by any organization to build on top of it, community driven development and usage.
- Free & open source software for students' basic learning. In fact, the app will reward users for each revision creation of a concept and not punish them by charging money for it.
- Lets build Reviseit.AI as a vertical LLM AI agent with orchestration with other agents for one mission.
-

BUSINESS MODEL AND KEY METRICS

Freemium model

Free : basic features for revision with one LLM & app integration.

Plus : Add on to Agent with multiple LLMs working together.

Key Metrics

1. Free and Paid users, Revision initiated, and Successful implementation of that knowledge.

2. Actual Learning happened metrics.

MARKET VALUATION AND GROWTH PROJECTION

AI IN EDUCATION IS ABOUT $6B MARKET GLOBALLY AND EXPECTED TO GROW AT ABOUT 40% CAGR.

1. Existing market players : Voovo study (5000 paid users) (raised $500k in preseed), Remnotes, Anki ($258M funding), Notion (recently raised $243M @ $10B valuation)

2. Near future : Google AI, OpenAI and others expected to add the same features to their models.

EXECUTION AND VALUE ADDITION

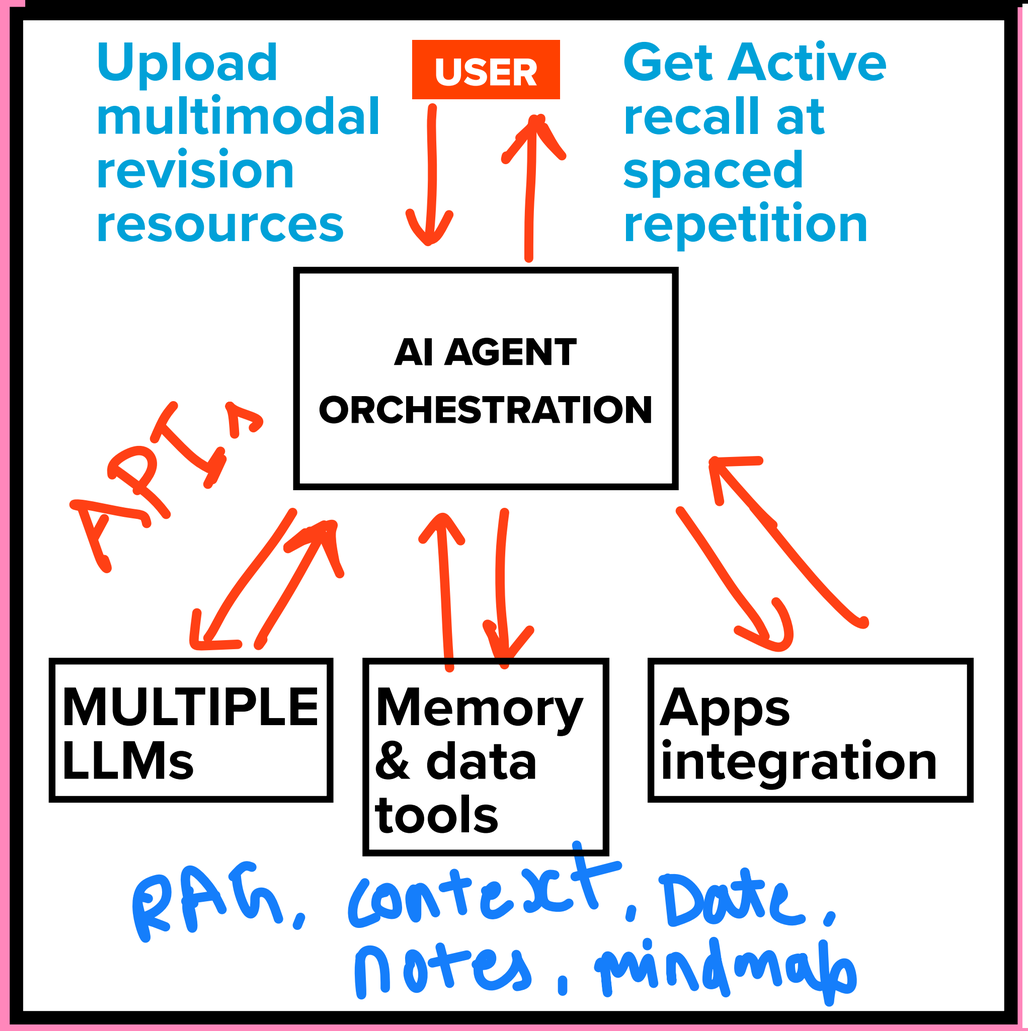
FIRST TARGET USERS ARE STUDENTS AT TOP UNIVERSITIES LOVE TO INTEGRATE IN THEIR STUDY PROCESS.

1. Since it is open source let's engage top leaders and researchers in this dimension of cognitive development to build world's best app that add a lot of value when used by any organization in their systems.

2. Together let's build something, that make an individual a superhero as well as making sure that an individual understands how this app affects his cognition so that he is able to do everything without the app also.

3. Ensuring safety, responsibility and transparency. As well as citation, logic and reasoning are the major challenge to work on.

TECHNOLOGY AND UI



1. This is very vague tech diagram & subjected to evolve.
2. Fundamental is that building a system with required guardrails that truly able to deliver the desired outcome and transparent about its processes to researchers.

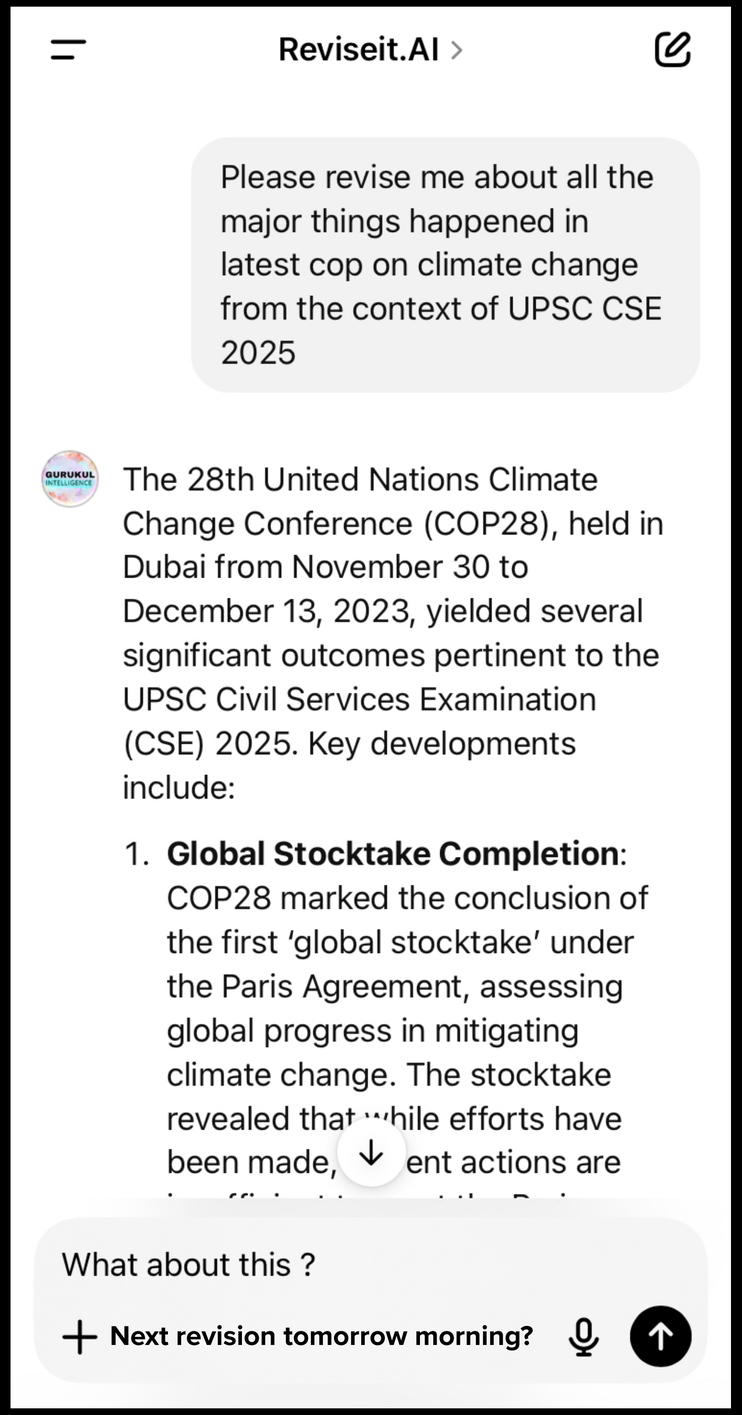
Founder

(Please contact me if i am able to add value to your life as a win win. I would love to hear about it.)



NOTE : This image is just a custom GPT and only for the purpose of telling you that UI will be just a chat format similar to this.

We will start with WhatsApp Business API as our UI.

Everything From planning to creating mind map by connecting everything you study is done automatically by our AI Agent system.
